QR Code Link to This Post I am looking to have some minor body panel work ( small rust repair holes) on my 1969 Chevelle repaired. I need someone with experience that can correctly repair the rust correctly. The car runs and drives and is very solid to start with. It is from the South West part of the U S.

I do not need it painted but will consider that based on your qualifications.

You must have your own tools, experience, and a shop to keep it inside. I will pay a fair wage plus your shop supplies. I will provide any parts up front so you will not have any out of pocket expenses.

Email me some info about your qualifications and how to contact you. I would like to start on it over the next 1-3
