QR Code Link to This Post Hello. Do you struggle to write content for your blog or newsletter? Do you have a ton of year end data entry that needs to get done that you don't have time for? Well, I'm here to help!

I have recently had to let a client go and this has opened up the time for me to help YOU! Hiring a freelancer helps you get the content you need in minimal time without having to go through the hiring process and absorb the cost of hiring someone on full-time.

I work on a price per project basis - this means that you aren't hiring me per hour which will save you money!

What can I help you with?

- Writing content for blogs, news letters and other forms of copy
- Data Entry (Including Financial as I have over 4 years of Quick Books Experience)
- Research
- Data Base Creation and Entry (Primarily using Excel)
- Other (Let's discuss any other projects you may have and if I can, I will help!)

Pricing starts at \$50/project. Pricing is dependent on content needs, subject matter, tasks required, etc.

I look forward to working with you and helping you finish 2017 strong!
