Getting a good sounding drums on your tracks is a lot simpler than what you might think. No need to spend precious time programming midi drums, that even with the best VST software, would sound mediocre at best.

I'm sivan, an experienced session drummer. I work with composers, indie artists, bands and more. Styles ranging from rock, metal funk to fusion, jazz and world music. I play well, get the work done fast and very attentive to my clients vision, inputs and needs.

You can send me a scratch drums track, a scratch midi file, an old drum recording or anything in between. You can explain me how you want the drums to sound, can send a chart or any other way you and me find that works best to describe the way you want the drums to be played.

I'm using high quality mics- Shure, Sennheiser, Audio Technica and more. All drums are recorded on a custom DW collectors Maple drum set- with a collection of different snare drums- woods, metals and acrylic. I have a collection of different cymbals-- to find the ones that would work best for your music. All professional quality gear.

My output is a raw WAV file(s), that you will later be able to edit and mix each channel to your specific needs.

Rates are per project- varies in length, number of tracks etc. Please contact me to discuss.

I'm located in Newark, DE- can definitely meet in person if you prefer.

No musician can play everything and you should always find the right musician that will truly represent your voice.

You can check out some of my recordings at

Please let me know if you need more info, recordings, videos or other samples.

Thanks
Sivan
