

## Looking for someone experienced in Speaker Reconing. (Benson Area)

## hide t

Location **lowa** https://www.genclassifieds.com/x-764622-z

QR Code Link to This Post I have several blown speaker baskets of the Electro-Voice, JBL and others I'd like to bring back to life.

I have the space to set up a re-coning station.

Also have others who have lamented the fact that they have broken drivers as well.

So....there will be the opportunity to continue on, after mine have been repaired.

From what's been quoted to me for such a job is at the piece rate of \$25 per unit.

Replacement parts and basic tools will be provided.

I'm including this simply as FYI..

All work will be on a contract basis agreement on location.

Thank you.
