QR Code Link to This Post Hey what's up? How you doing?

I go by the name of Eezy and I am a music producer going around searching for new people to do business with and collaborate with. I understand you may be in search of some new beats. If you're interested, give me a listen at my website: <http://eezybeats.com>

I have beats for old school rap, trap, soul, pop, R&B, and more! Search for what style you want at the top bar. If you're interested in my mix/mastering services, a custom beat, or even a recording session, check the services section of my website for more information on that as well.

If you have any questions or other inquiries about my services, please feel free and don't hesitate to reply to this e-mail or private message me on my Twitter, @ListenToEezy. I will work with you to find the sound you want, get the beat in your e-mail ASAP, and make your next hit. Lets make this!
