Just moved out to Indy from Southern California. Pro gear, pro chops. No ego, just want to enjoy making sweet, sweet music with other solid musicians as well and see where we can take it.

Have a ton of original material, some of it needs some out of the box ideas from some other ears. Totally open for you to bring your own material to the table just as much as mine.

Influences include but not limited to:

A Day To Remember, Bring Me The Horizon, Killswitch Engage, Beartooth, Strung Out, Story of The Year, Avenged Sevenfold Musicians of any craft feel free to hit me up. Looking for singer, guitar, drummer, bassist.
