

NOTE: If you don't want or need the (6) AAA batteries to be included, we can reduce the price by \$2 (bringing the cost to \$37).

- Complete with a remote-controlled train, an exciting main terminal building, train tracks, and passengers, the Fisher Price GeoTrax Rail and Road System Grand Central Station provides hours of creative fun for children ages 2-1/2 and up. It is a part of Fisher Price's line of GeoTrax toys.
- The Grand Central Terminal offers the classic GeoTrax play and enhances imaginative play with the addition of articulated figures.
- The playset includes a main terminal building.
- Drop cargo through to the lower level, where there's a weigh station, or make your way to the train yard.
- Set features an information area with destination board, food and vending stations, even an elevator with mechanical action.
- A Train Powered by Imagination! By using the remote control, your child can make Aero the Engine speed along the track and pull into Central Station, with his driver, Eric, right inside! Send the passengers up and down the station's elevator, or put them on the train for an exciting ride. Load up the train with cargo using the crane. Thanks to the power of your child's imagination, the possibilities are endless.
- Durable and easy to use, the toy is constructed from durable plastic and features large pieces perfect for little hands. The big, easy-to-use remote control makes the train go backward or forward and has a range of about 12 feet. It includes an automatic shut-off feature to preserve battery life. The sturdy train tracks snap together easily in a variety of configurations, and the whole set can be used with other GeoTrax accessories.
- The set comes with 3 figures (Eric, the conductor, and 2 passenger figures).

- Pre-assembled
- Fully tested and works great
