QR Code Link to This Post 1993 Dodge W250 4x4 manual 5speed transmission, 8' box with liner, rear hitch, elec brake control, (I've had for 15+ yrs and only pulled trailer a few times for maybe total of 500 miles at most) . good tires. never had a plow on it. Freefloating rear axle, HD front axle, manual front locking hubs. 21 mpg, I've not noticed mpg vary much either loaded or empty. Starts and runs excellent. has block heater; but, almost never used. Wisconsin truck for the last 15+ years, before that Arizona truck. Starting to rust. for age, a really good mechanical machine. it was my primary vehicle/truck til last year (sometimes I think it's a better truck than my now 2000 F250 SuperDuty !). selling because my new truck is new, the old Dodge must go before it gets crappy from sitting. really hate to see it go. motor runs very very good, starts, runs vg. the 5spd Getrag manual transmission was professional rebuilt and includes the updated snap-ring fix. Manual lever 2spd transfer case. and the rear differential is limited slip /.
