www.powerworldsports.com 2015 Arctic Cat® M8000 Limited 162Features May Include:Mountain Rear SuspensionThis springless 162-in. FOX FLOAT® 3 air shock rear suspension reduces snow buildup weight while providing a full range of pressure/tuning options.Arctic Race Front SuspensionTall, lightweight ski spindles provide great torsion rigidity and strength. Angling the shock load back toward the rider's mass, results in optimal caster/camber to improve comfort and handling. FOX FLOAT® 3 shocks give you the feel required to boondock through the backcountry.8000 2-Stroke Engine160-class HP makes it the most powerful 800 engine in the industry. It features a lightweight, quick-revving crankshaft, twin spark plugs per cylinder and weight-saving engine reverse technology. The engine knock sensor provides octane recognition, giving you more fuel options.ProClimb®, ChassisWe need it to be as light as possible without sacrificing strength. The upper spar assembly design is the answer, proving itself on the scales and on the mountain. Shock mounts transfer energy directly to the spar assembly, the strongest point of the chassis. Rider position is ideal.Push-Button Engine ReverseThe push-button reverse is all about quick, easy activation. This feature reverses the direction of the engine rotation. In addition to being smooth it's also a weight savings.Deluxe Digital/Analog Gauge w/AltimeterChoose between digital and analog speed and tachometer readouts. And check out the altimeter to see just how high up you are. There's also an odometer, two trip meters, engine hour meter, reverse indicator and warning lights.ProClimb Front BumperThese lightweight aluminum bumpers add superior protection and a bold, stylish look. They are scratch resistant and have a powder-coat finish.Telescoping HandlebarDrop down for the trail. Pull up for the powder. Available on many M Series models, the quick-adjust telescoping-steering system allows riders to quickly adjust
