QR Code Link to This Post I have a gently used iPhone 6 AND iPhone 6 Plus for sale. We switched and upgraded to ATT and no longer need these phones. Both phones are 16GB, but have been meticulously cared for since the box was opened. Both have had tempered glass screen protectors since new.

I'd like to sell them both at the same time for the $350, but would be open to offers. These work on Verizon, but i think you can swap SIM cards and get them to some other carriers (check with your carrier prior to purchasing). I have included pictures of the iPhone 6 and will add photos of the 6 Plus soon.

Note the pencil pointing to the line on the iPhone 6 screen. This is a crack in the screen protector, i can take it off, but it doesn't affect the use of the phone and you can have a protector for free that still has plenty of life left.

As for accessories, i'm sure i can muster up an iPhone square plug, but i don't think i have a working pair of headphones or an extra charging cable. However, if those are deal breakers, let me.
