QR Code Link to This Post Do you want to take your piano playing to the next level? Tired of reading leadsheets and not knowing how to make it sound hip? Frustrated with your voicings? Want to sit down and play without having to read music?

If you love jazz piano but can't seem to figure it out, consider taking lessons to improve your ear, theory knowledge, and dexterity at the instrument. Wondering what Herbie is playing in the bridge of My Funny Valentine? Can't seem to figure out the contrapuntal lines in Bill Evans solo playing? What's the secret to McCoy's modern voicings?

I'm seeking serious students who have experience playing piano (classical or jazz), have a solid grasp of major and minor scales, and are willing to put in daily practice between lessons.

If this sounds like you, please contact me via Craigslist, and I'll send you my resume and links to my playing. Perhaps I'm the teacher you've been looking for.

Any age accepted, but must be serious about working and have a passion for jazz or improvised.
