 New with box -- dog training obedience system

PetSafe Adventure Dog Remote Training Collar with tone and static stimulation

Retails at amazon for \$159.99+tax and at petco for \$189.99+tax.

Here's what I like about these units:

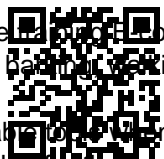

- Very well-built; rugged, to withstand impacts; quality materials feel substantial to the touch.
- Charge transmitter & receiver simultaneously w/included cable splitter;
- Consistent stimulation;
- Level 1 stimulation is almost not noticeable (the way it should be), & each level up gives a noticeable difference.
- Well-known brand... PetSafe has been around for a while... and is sold in many pet stores.

8 levels of stimulation plus two tone (sound) training options;
 Range up to 800 yards __--__ Waterproof (consider this as water-resistant, just to be safe);
 Adjustable collar (up to 28"), for small to large dogs...
 or just attach to your own collar for a custom fit.
 (optional: expand to 3 dogs w/extra receivers.)

Remote training collar system always works on amazon. I've used it for many years in the correct fashion, working, leashing, sitting, standing, and other general obedience. I've valued it for when I was out of the house, and it's been a great training tool. Invaluable for the conscientious home pet owner. I've never needed shock, and I have the lowest levels, for any dog. Obedient dogs need "vibration mode" only. Just to get the dog's focus back on the owner. Please read/watch (youtube it!) some educational material before getting started.. If requested, at time of pickup, I will demonstrate and explain how to use in a responsible manner and how to achieve the desired results. As always, all training tools require proper skill by the.
