QR Code Link to This Post 1998 Ford E350 Econoline van, under 200,000 miles. Very cool project vehicle! This van could make a great RV/camper with all the hard stuff already done. Just needs a bed build-out. Secondary battery which you charge while driving runs outlets (see xmas lights in the photo). Pump sink in countertop runs from the jug you fill with clean water, drains to second jug which you simply dump when needed.

Asking price is low because:

Driver door has cosmetic damage, the rear passenger window needs replaced (but is covered and watertight in the meantime), and has some issues with the spark plug coils which causes engine trouble. There are new tires, clean title. I love the van, but needed something more practical. Lots of life left in her, as a hobby or for a work.
