QR Code Link to This Post I re-homed a puppy from this individual approx 6 months ago. Was told they had 1st puppy shots and had been deformed. Writhing 2 days this puppy would not eat, drink, was vomiting and had severe diarrhea. I had to rush him to a 24 he get. His intestines were filled with worms. I happily spent \$350 on vet costs that night to give this pup a chance. Not to mention the \$350 re-home fee. Chiefs is very much healthy and happy today. Great dog just poorly looked after by these backyard breeders trying to make a quick buck.

If you still decide to get a pup from these people please be sure to get him or her in to get asap to get.
