QR Code Link to This Post Two people are moving out of our shared living space and we are looking to fill their rooms! There are a total of five people living in the house which was built in 1904. The space was recently renovated and features a claw foot bathtub, a marble kitchen island, an in-house washer/ dryer room, and a fantastic front porch. The common rooms are spacious and great for cooking, lounging, working etc. We have a wonderful landlord who lives upstairs and is happy to help whenever we have any issues. The bedrooms are right next to the bathroom and and features walk-in closets. We are looking for a like-minded roommate who is willing to participate in household chores and coexist with 4 other delightful humans who love to cook, watch movies, and hang!
