QR Code Link to This Post 75 gallon aquarium with custom made oak stand. Tank has been set up less than 2 years. Would come with a light bar, canister filter, heater, and any food and weekend feeders I have left. Fish include several varieties of tetra, a few cory catfish, 4 angelicus botia loaches, and an albino bristle nose plecostomus, i think around 2 dozen fish total. It use to be a saltwater aquarium so the light bar has the regular bulb and uv bulb. It has the over flow tank fittings through the bottom of the tank which we sealed using pvc pipe and capped above the water.

Willing to sell fish separate if someone wants just the fish. \$20 for all of them.

I also have a 5 stage reverse osmosis system from bulk reef supply with a 32 gallon plastic garbage bin to hold water if you want that as well.

\$200
