QR Code Link to This Post This post is for females interested in an ongoing photo opportunity in glamour photography. The work touches on the basics and foundations of photography. Most of the photo sessions are set outdoor i.e. landscape, beach, natural areas. I like to build from the ground up and see what emerges from there. I'm searching for someone that would be a good prospect for future projects and production work. There is no required or assumed experience with this opportunity. I look forward to working with you soon. If you have any interest or talent you would like to share, feel free to leave your name contact # information and a description/photo. I look forward to working with you and discovering something new. Hope to hear from you soon.
