QR Code Link to This Post Hello,

I'm a PhD statistician and data scientist now working in industry. I provide freelance services on the side.

I am happy to help with both formal statistical analysis (paper & journal submissions, dissertation help, etc) as well as more data science oriented projects that involve AI & Machine learning.

I'm experience with R, Python, C/C++, SAS, java, javascript, html and other languages.

Qualifications:

I hold a PhD from Yale in Biostatistics and have previously worked in biotech, automotive tech, wall street and as an actuary.

If you'd like, I also provide a brief consultation over the phone to make sure that this is something I'm able to take on. Please feel free to reach out if!
