QR Code Link to This Post Hey there,
We're looking to make some interactive infographics around renewable energy topics and batteries.

Here's an example of what we're going for: <http://addinfographic.com/how-solar-panels-work-infographic/>

We want to make some similar ones on 'how batteries work' and 'how inverters work'. We can give you some loose sketches and a lot of direction on what we need, we just need help making it interactive. We'd prefer a JavaScript library be used for this (over flash).

If interested, do not send a really long email (a lot of people on craigslist do that). Just send a bit about your work and a couple links of similar work.

We have no idea what this sort of work costs so please send your.
