QR Code Link to This Post Cobra Hybrids with upgraded grips and REGULAR flex graphite shafts. Three of the four original headcovers included. \$55 each club, prefer to sell as a set.

#4 and #5 are Cobra FLY-Z XL models:

â€¢ Speed Channel is an engineered channel that surrounds the club face to help minimize face thickness and provide increased ball speeds across the face for incredible distance with forgiveness.

â€¢ Offset Design helps the golfer square the club face more easily at impact. Forget about that slice, and enjoy higher, straighter, more draw-biased shots.

â€¢ Back CG Zone Weighting removes weight from the crown to reposition it low and back in the head for a low, deep Center of Gravity. Extreme forgiveness on off center hits.

#6 and #7 are Cobra MAX models:

The COBRA MAX hybrid is designed to deliver high launch and easy straight ball flight. Featuring an offset hosel design, this hybrid was created for higher handicap golfers looking to reduce the slice and produce straight shots whether in the fairway or rough.
