QR Code Link to This Post Years ago I lost my beloved cat. I put up posters and never did find her. She is black and white with a sort of "M" on her forehead between her eyes. Her name was Alice. I lived on a busy road off of Zapora Drive in Hooksett, N.H near space center. I was just a teenager at the time and had to move soon after. One day she didn't come home after getting outside (people always let her out even though I wanted her to be an indoor cat) I searched all the roads to see if she got hit, found nothing. It was very cold. During winter of 2013. All I can hope is someone found her and she has a good home. Even if no one will give her back I just want to know if she found a new family and is safe and didn't freeze out there. She was only 3. She was a fairly small cat. Not large. Bright eyes. See pictures. Please help find Alice, send pics if you think you have her!!
