QR Code Link to This Post I'm looking for a finish carpenter to do a quick job. Only 21 linear feet of crown molding above my kitchen cabinets.

I have the crown.

Looking for TODAY.

Must be a master at crown. I have just enough to do the job. One wrong cut and the job is screwed.

A pro should take less than an hour to do it.

The kitchen is finished and just waiting on the crown. Pictures are there to show.
