QR Code Link to This Post Great little tube! A very loud 5 watts. Hand wired, tube amp with nice plywood cabinet. The are great blues, lap steel and harmonica amps too.

This is one of the early reissues before they put the stupid mesh over the back panel. Great condition except for the annoying tolex that shrink and curled at the seems. There is some glue on the sides from gluing down the curled tolex. Annoying.....

But other than that, no rips, dings issues etc. Just awesome tone! thanks for!
