*****Lesson Structure*****

Private instruction is a great opportunity for a student to learn the details to playing trumpet and making music. Playing trumpet can be fun and enjoyable. It can also be one of the most physically demanding instruments to play.

The physical aspect of playing can be the most crucial. Learning to play with proper air support, embouchure set, correct finger technique, and posture will not only make playing easier, but will also progress your abilities faster and more efficiently.

My lessons are structured to take the proper physical approach in the beginning while also the fundamental techniques such as: range, flexibility, proper embouchure, and more importantly, Breathing Control and Projection/Orchestral Support.

The other part of my lessons involve learning the mental focus needed to make practicing efficient and beneficial, coping with performance anxiety, and establishing mental confidence while performing.

All these aspects take time and practice to acquire, but are very important for a trumpet player in order to make trumpet playing fun, exciting, and.
