QR Code Link to This Post This is just a warning for people who are looking for Cocker Spaniel puppies or dogs. I dealt with a breeder from Flying F Farms & Kennels, Bertha Mn. or Brainerd Minnesota. He has a web page plus he puts his puppies on "Puppyfind". I made the mistake of paying out \$1,000 hours for a puppy that had bad knees. He replaced this puppy with another one that had bad knees, he then replaced that puppy with another puppy with the same defect. Nicholas Dean Messer line breeds and we all know what that means it's inbreeding. I did not know this when I bought my first puppy. I took mr. Messer to court and won my case he owes me money Whether I see it or not is another thing! Mr. Messer will not let you on his property to see his dogs or his puppies he brings the puppies to you. He will make up some excuse for you that you cannot come out there. That was my first red flag! I am posting a picture of one of the dogs that I have received from him and I found a new home for her and she will need surgery on her one knee. It is completely scarred over, it was when I got her and she was only four months old. She has a Fantastic home now. I am just letting people know out there that love this breed as much as I do and I don't want them to be screwed like I was that's why I am writing this. This is all true. If you want to contact me that's fine I can tell you a little more. Or maybe lead you to a puppy or two. Thank you for listening or.
