QR Code Link to This Post I'm getting rid of my tanks. I bought the 36 gallon and was planning on putting the 20 onto the 36 but never got around to it. I had bought some rock flowers from online and they died while I was at work and it bombed the tank, there is still a mushroom coral and possibly some more somewhere in the tank. I kinda lost interest after loosing around \$1,000 worth of livestock. There is a pair of clowns, fire shrimp, a large Halloween hermit crab, and several snails, and small hermits. The 36 gallon stand is not finished, it is built with pallet wood and would look really nice finished. I can give you some pallets if you want them. Everything needed to get the 36 up and going, between the 2 tanks. Includes a very large coral skeleton, rocks for both tanks, sand etc. Can text more pictures of everything has lots more than pictured, over \$1,000 worth of.
