QR Code Link to This Post I am looking for a webmaster. Preferably a resident of El Reno, but it's not a deal breaker to be out of the area.

Looking for a forward thinker, an innovator, someone who can design a complex, visitor interactive, multiple subdomain website and maintain it.

Someone with a gamblers heart. Someone who is willing to work on this project for a future profit share rather than a wage.

This project is something that you can truly be proud of... especially if you are an El Reno resident.

It will encapsulate everything that is El Reno and Canadian County and place it at everyone's fingertips.

It will be...

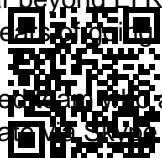

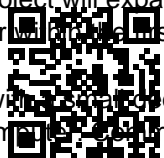

- > a platform for communication,
- > a place to browse the El Reno area merchants, retailers, restaurants and the business sector,
- > a place to buy or sell things,
- > a place for entertainment,
- > a place to share your views of the El Reno area,
- > a place to hang your hat! And so much more...

This requires a person with vision... Someone who can see the potential of this project!

This project will expand far beyond El Reno and Canadian County. It will become nationwide and eventually international and have an income potential of 7-8+ figures per year within the next 5 years. I am willing to give a 10% share to the person who takes this project to the next level.

Work will be done on a dedicated server and are equally shared between the project and your own work. Work at your own pace, in your own time, from your own home. No need to own computer. Communicate via email or phone with the occasional face to face luncheon.

Please apply through Craigslist email relay. Serious respondents will be given my personal Skype and email.
