---	--	--	--	---	--	--	--	--	--

a lifetime fisherman. Steve and his dad ran the boat and both Steve and Paul have a determination that their customers are going to catch fish. Steve has all the provincial accreditation's required and more and the very best equipment. He knows the spots to fish and does everything in his power to make sure his guests catch fish. Steve also puts crab traps down for guests.

The accommodations and food was five stars (Steve is also a chef) with his mother working on lunches and helping out you are pampered beyond anything I have ever experienced.

I caught my limit of all fish and we were the only boat coming in with fish. Steve filleted my fish and vacuum packed and froze them daily.

As a consumer and a fisherman I would recommend Steve and his charter business to all looking to get value for their money, and get a friendly professional experience. Oh, you will catch fish, Steve will do everything possible to make sure of that.

Thanks again guys for the hospitality and great time I enjoyed with you, rest assured in the fall I will be looking for another trip with you.

Larry Woodruff
