QR Code Link to This Post hi there. looking for a groovy bass player for original music and covers that don't suck. think 60's/70's blues, rock, rock n' roll. anything but heady jazz is quite alright, just love to groove, drop sick bass lines and make shit rain, also like to not play when there's nothing that needs to be played, if you can sing in key, that's a real feather in everyone's cap. we have guitar, drums and keys.
