QR Code Link to This Post Responsive... at any volume.

Broken in and aged, but not broken down.

Aged tweed, but not a rip anywhere.

Serviced this summer, in excellent condition.

The most accurate Fender reissue to be produced, made in the USA.

Manufactured in the 90s, it's done many gigs. You'd get the same sound that, say, Keith Richards got out of an original '59 back in the 70s.

Let that sit for a minute.

You get a vintage sound, look, and feel without the \$4500+ premium and 20 year wait.

That's the Fender Bassman.

I'm constantly travel throughout the midwest, but should be back in Milwaukee soon.

I am not prejudice against any race, creed, nationality, disability, sexual orientation, skin color or even political views reflected on your bumper stickers but I am *very* prejudice against the soccer team you support if you show up in a Paris St. Germain jersey, I will walk out on you.
