I used this on pc. It works on xbox one/ps3 with correct wheel attachments

You will need to buy a wheel from fanatec..
 They range from \$89.99-\$399.99 for the wheel.

This is one of the best pedal sets for racing simulators. Vibration motors on brake (for abs) on throttle (when losing traction) . The clutch has a cam to emulate the degressive clutch in a real car.

High end sim racing setup for sale

Have all original boxes
 I just don't use as much as I want

will not ship
