QR Code Link to This Post 2010 Tundra 5.7L 3UR engine with 117k miles.

Low compression on cylinder #8 40psi

Other cylinders tested good at 180psi.

Did a cylinder leak down test and It has bad piston rings on cyl #8. Comes with harness but no ecu, alternator, p/s or a/c compressor.

Engine is worth more than what I'm asking once it's fixed. Vin 5th digit "Y"
