QR Code Link to This Post Good afternoon, We have several rental properties in which we had some basic electrical work done (gcfis installed where required and one house had a service upgrade, new meter can, feeder line, weather head, breaker box,) All the work was excellent however we were unaware the electricians were unable to pull permits, We need a licensed electrician to inspect the work and pull the appropriate permits for each job so we can have Sce&g turn power back on. Please contact me with your rates to look at the work and your time to pull permit and associated permit fees. Would like to have this done ASAP Have a few additional projects we are accepting bids on at 2 additional locations including electrical and HVAC work (if you also do HVAC or know someone with reasonable rates) we supply all materials for our properties! Please send me your hourly rates, how much to pull each permit, and the best contact number
