QR Code Link to This Post We are looking to rehome our very loving and gorgeous female Akbash. We recused "Tesla" from the local shelter and now after 6 months she's healthy and ready for a permanent loving home. We do not have any history for Tesla, but we know she was at the local shelter for over a month and her previous owner's surrendered her for unknown reasons. Tesla is an "anti-social" breed, and is not a pet to take to a local farmer's market or to be kept in an apartment. Tesla however is very loving, loyal and adores attention. She loves being brushed and snuggling as well. Her hearing is extremely keen. Her breed is also known to protect herds from wolves and other predators. Tesla is spayed and current on all her vaccinations. We currently live in the city and have two other Labs, so we cannot keep Tesla due to city restrictions and grumpy neighbors.

Tesla is a very unique and requires a lot of space for running and exercise. Tesla loves cats and isn't bothered by them at all. She currently weighs 75 lbs. and will get to approx. 80-90 lbs. total. She's very protective and loving and we only want the best for her. Hopefully someone out there who understands her breed and can provide her with the best loving and long-term environment. A small adoption fee is requested to aid her operation, vaccinations and micro-chip.
