QR Code Link to This Post I have a Kemper Audio Profiling Rack that I use with my guitar. I need help connecting it and setting it up.

I have a Focusrite Scarlett 18i20 interface that I need to use it with.

Here's my specific problem, I can't get my headphones to sound the same as they do when they are plugged directly into the Kemper's headphone jack when I plug it into the headphone jack on the interface. In the interface it sounds lower in volume, less dynamics and muffled. Direct in the Kemper though it sounds great.

I do not know what I have set or connected wrong, but that is what I am willing to pay you \$60 cash to find out.

Send me a text if you actually own a Kemper yourself and think you will know how to solve this issue.

(If you don't own a Kemper I doubt you'd be able to figure this.)
