QR Code Link to This Post Seeking a Traditional Surrogate. We are an African American lesbian couple we are married and we are very laid back drama free financially stable people. We have wanted nothing more than to have our own family. We have suffered several miscarriages and were told we could not carry a baby full term which devastated us. We prefer someone who is not so much about the money but would love to bless us with our bundle of joy. We will compensate monthly and can discuss other things. We would have a legal contract written and signed by us so that everyone is covered legally. So many people have taken advantage of us wanting a child so badly that we are very nervous on finding the right person to carry our blessing. For more info please feel free to text any time. God
