QR Code Link to This Post I am a Content Marketer that moved to the Bay Area a year ago who is launching a mobile game and seeking interested collaborators with considerable, relevant talent(s). Resumes are welcome, but not necessary. Students please feel free to apply.

We are a two person (not co-located) team looking for one or more passionate individuals who would like to found and build something special for split equity. A fair amount of work has already been done, but my business partner and I are ready to expand the talent pool and start generating more traction.

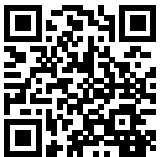

This is a very grassroots project, but close to the verge of a breakthrough with some very interesting marketing assets. I am also a certified Business Analyst and can catch anyone up to speed on the work that has been done in their individual area of expertise.

Emails only please and I'll share my phone number to schedule a meetup after some discussion.

Those unwilling to sign a Non-Disclosure need not apply.

Looking for, but not limiting to:

Marketers/PR
Level Designers
UI/UX
Illustrators
Programmers
Enablement
