QR Code Link to This Post My family has a litter of pups for adoption. This litter was not planned and the mother has an appointment to get spayed at the SPCA in couple weeks. They are 8 weeks old and ready to melt your heart and bring joy to your home. The litter received their first shot and were dewormed at our family vet last week. They are ready to go today. Adoption fee 250. Mom is a black lab and dad is a yellow lab. Both parents are American labs. We are adopting this litter without papers. Feel free to text or call with any questions you might have. We have 7 pups left for.
