

NO COMPANIES, NO ADVANCED SECURITY DEPOSITS!!!!

### Milestone 1:

1. All slideshow image will be rearranged.
2. Adding all new images required in the slideshow.
3. Set the width & height of the images for the slideshow and auto rotations of the slider images.
4. Creating the thumbnails for the grid view of 5\*5 and load more or pagination option.
5. Expansion of the current small slideshows to wider one.

Put an underconstruction banner on bottom of page and link the banner on madmediaonline.com (underconstruction page must be mobile ready and be expandable for small and large screens-no exceptions) and link to madmediaonline.digimedia2.net/test3 (viewable best on desktops and laptops for now)

Our company needs an undercontstruction page for madmediaonline.com which will be a fitness model database. 75.00 dollars payable for underconstruction page.

[illegible]

---

Create a new slideshow on both "test3" and "test2" underneath the first slideshow with 5 new images -  
Add two new John Q graphics on "test2" and "test3" under the third slideshow -  
Add three new images to a new slideshow (from Winn new comp cards) underneath the textbox under the first slideshow -  
Create a 5x5 thumbnail grid with images from the "portrait" folder using 250x250 thumbnails, allowing for people to click the image to make it go full-view, and create tabulation/pagination -  
Create a city-based dropdown for cities that models are coming from, and allow sorting by city for thumbnails (350x350), when the image is clicked they'll go full-view -  
Create bodybuildersandmuscleworshipscenes.html with tabbed content depending on city and password protect the necessary portions (ie. contact information) -  
I can make it so that it doesn't zoom in so much on small screens and is semi-proportionate on larger screens

These corrections to be done asap.

Create button for posting of jobs and web administrator login to delete jobs after being posted for 90 days create a login system for for everyone) and have the ability to pay via PayPal and store that they've paid in their account information (within the database). I can do this -- which includes developing the login system.

For madmediaonline.digimedia2.net/test2 add 5 slideshow graphics underneath first slideshow and 2 john Q graphics underneath third slideshow. Remove cincopa plugin and rebuild slideshows without the plugin

Updated directions: <http://madmediaonline.digimedia2.net/test3/>

Design directions for the Home Page of Mad Media Online

Go into the Winn new compcard folder and get the textbox design

Place the textbox design underneath the first slideshow.

Also add 5 slide shows underneath the first slide show  
and also add two John quinlan slide show underneath the third slideshow.

Add the 3 new slide show graphics titled Slide-1, Slide-2-, Slide-3 1800X1400 that are located in the folder titled Winn new comp cards in a jquery slideshow that moves automatically on its own. Place this slide show underneath the textbox that is located underneath the first slideshow

Go in the portrait folder. Create 250X250 thumbnails of the portrait images.

Create a Large Tab (that is shiny black that says New Fitness Model Portrait Gallery

Make a 5 thumbnail column/5 thumbnail row underneath the second slideshow. When thumbnails are clicked the full size image pops up. If you run out of thumbnails, the last row/column may have less than 5 row/5 column thumbnail column.

---

Create another tab under the portrait gallery that says new Landscape fitness model gallery and a dropdown for various cities, new york city, dc metro area, dallas, oakland, ca, Delaware, Dover, Richmond, VA include the fitness models with the specific city listed on their comp card under those drop downs. Create 350X350 thumbnails for those comp cards and when clicked the full size 700X474 image will appear and when clicked in the upper left the image will go away again until the thumbnail is re-clicked.

Scroll down to the slideshow that has Richard Tricky Jackson, Spyros etc and use code to make this slideshow be able to expand if viewed on wide screen monitors as when I view it on widescreen monitors, that the slideshow shows wide on the left and white sides of the images. Get rid of the white edging on the images for Richard Tricky Jackson and Spyros by making the images be able to expand appropriately for wide screen monitors. Make sure you include code that makes the entire website expandable for wide screen and narrow screen monitors and mobile devices.

Part II- Bodybuilding and Muscle Worship Scene Chapter- Begin developing the Bodybuilders and Muscle Worship scenes chapter located at the bottom of the status bar.) Create a bodybuildersandmuscleworshipscenes.html page and link the bodybuilder and muscle worship scene link at the bottom of the page on the status bar to the bodybuildersandmuscleworshipscenes.html page.

(Wont be able to view full page under bodybuilder and Muscle Worship Scenes unless logged in. fitness model and bodybuilder profiles in folder for finishedprofiles.zip. Create thumbnails for each graphic-thumbnails should not have the bodybuilders and fitness models contact info on them, but when clicked will be able to view contact info, but make sure to have them log in before they can be clicked like last time. for Bodybuilders and Muscle Worship scenes.) (Also the thumbnails on home page and the link that says bodybuilders and muscle worship will remain. But, the bodybuilders and muscle worship scene link at the bottom of the page will have another page protected with a secure password where you can see additional bodybuilders and their contact information. Divide them by city DC, LA, NYC etc and the folders have the cities they are located in.

Create a transparent login page for the Bodybuilding and Muscle Worship scene page that will allow you to view the complete website once logged in. But won't be able to view the bodybuilders contact info on the bodybuilder and muscle worship scene page and click the thumbnails to view their contact information on the comp card images unless logged in. The login will username: madmediaonline and password madmediaonline (lowercase)

Also, create a page for Bodybuilders and Muscle Worship scenes and create different dropdown chapters for the various cities Las Vegas, DC, New York City, and Los Angeles, Go into the finished profile folders

Place the fitness models listed in the folders with a specific city under the chapters labeled that same city for example if you see alec in the los angeles folder place him under the los angeles tab in the bodybuilders and muscle worship scenes chapter. Also, look at the sample profiles. Each bodybuilder in the muscle worship scene section will have a thumbnail when clicked you will see their page with full length pictures you can click with their contact info. Also, link their e-mail addresses to a e-mail contact form and also allow their phone number to be display once the phone number tab is clicked- but won't be displayable unless logged in eventhough the graphic already has their contact info, just display their thumbnails without their contact information when logged out. Create 350X350 thumbnails for these people.. Create a transparent login page. Again, the username and password is madmediaonline

#### Part IV

Give clients the ability to post jobs under the vip job section if they pay 100.00 by you creating a paypal button and linking it to (my paypal e-mail address under the vip jobs section. Once they pay the fee they can post a job by entering job title in the form and job description and their e-mail address (required) and phone number

---

(optional) on how to be contacted. Also add a become a fitness model link on the status bar at the bottom of mad media online please create a form which allows them to put their first and last name, e-mail address, phone number, and be able to upload up to 10 pictures. Link the form to e-mail address that will be provided . Give me administrative login privileges that allows me to delete, edit and approve job.
