QR Code Link to This Post This F250 is equipped with a 6.0L diesel and has a Knapheide service/camper shell on the bed with ladder rack on top and shelving attached inside. This truck is a perfect setup for a business service truck or for the DIYer. The truck has 2 new batteries, new oil filter, new oil filter cap, new oil change (15 Qt Mobil), new fuel cap, new fuel filters (engine mounted and rail mounted), new headlight, new wiper blades, new coolant, reverse alarm, the alternator is less than 2 years old and the tires have a lot of life left on them. the A/C works great , blows super cold! This was a fleet vehicle so it was well maintained with regular service so mechanically its in great shape, IPR numbers are perfect, ICP-640 at idle at operating temp, EOT and ECT's are within 5 degrees of each other at operating temp, FICM-47.5+, transmission is strong and fluid is good. Come check it out and see for.
