QR Code Link to This Post Gage is a 7 month old black lab. He was born April 16, 2017. He is AKC registerable (I have his paperwork just need to send it in). He is also not fixed and would make someone the perfect stud dog. He's amazing with kids and other dogs. Chases cats. Good on the leash. UTD on his shots (I have all his paperwork in a binder from the time he was a pup with the breeder up until now). He needs a yard he can run in and i have a small trailer close to the road. He is also good with horses

I paid a great deal of money for him and i know o won't ever get that money back. I will be every picky as to where he goes and will require references.

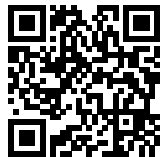

Please PM for price
