QR Code Link to This Post I hate most cat scratching posts - they're unattractive and in the way. This one makes an attractive statement. Attached to the wall, cats love it and it looks like a decorative item. Cats can climb up it as well. Looks like rattan (not sure the material) and then enameled metal. Easy to put up and take down, but please note it's not stand-alone. It's 45 inches at its widest.
