QR Code Link to This Post Hi, my name is Alonso.

I've been living in big NY City for 8 years. I'm visual artist, published writer/book illustrator, and art tutor. Songwriting is my hidden but not less important commitment. I'm into rock/indie, very 80's style. Besides I'm bilingual (Spanish). I'm versatile musically and open to a wide range of genders. Sky is the limit. Here is a YouTube link of an indie recording of one of my compositions. It was my first days in NY City which inspired me the song. I can imagine this work arranged in many styles as I thing that is catchy. There I play guitars, some keyboard and sing. I think that a good song can be made with any instrument. Hope to hear from you. Blessings.
