QR Code Link to This Post I'm looking for app partners to code and design some ideas I have for uncomplicated mobile game apps. Nothing revolutionary... literally dots and lines but you can get as fancy as you like. I just want to get into the app stores and eventually market/monetize so that I can eventually pay you accordingly. I will give you a list of ideas, you decide to take it on. Please no rates or company pitches... just seeking an easy going developer partner with nothing better to do,.
