QR Code Link to This Post Im looking for someone to diagnose and see if my car needs a new transmission. I've replaced the cv axle which was one part of the problem. Now whenever I go from drive to park or vice versa it has a bit of a delay. I just dont know if its normal but I would like for someone to take a look and determine if it is the transmission if so I got it ready to go. I can't move the car so I would prefer it be done at home. I don't have a lot of cash but I have some brand new bluetooth speakers I can do for a partial trade for your service. Please provide me with references and if possible certifications. I would like someone that knows what their doing.
