QR Code Link to This Post Im interested in finding a highly skilled, knowledgeable and efficient construction handyman to help wrap up various construction projects throughout the year. Im a local builder who often needs help after drywall is complete to close out projects. The various duties will be to install towel racks, toilets, mirrors, trim and doors, cabinets, shower doors, tile, flooring, light carpentry, some electrical, some framing/siding, faucet trims (peetraps) water tank, door adjustments etc....And to be very skilled and understanding at problem solving in general. The starting pay is \$20 hr cash and we may also work out piece work for projects in the near future if it works out easier and things are coming together swiftly. Please give me a brief description of your work experience, knowledge and availability. Thanks and have an awesome day.
