QR Code Link to This Post Temple University is looking for healthy, HIV-negative volunteers over the age of 18 to participate in a study of an investigational long-acting injectable anti-retroviral medication to evaluate its safety and durability in the body. Volunteers will be given one injection and monitored overnight and return for brief visits over a 10 week period of time. Evaluations will include medical exams and blood draws. Volunteers will receive compensation for their time and participation in the study.
