

Food grade 5 gallon plastic buckets (10 count) (50 USD)

Location **Washington**
<https://www.genclassifieds.com/x-779611-z>

QR Code Link to This Post Ten five gallon plastic buckets, food grade. Originally purchased for building self watering planters, but never got around to doing it and now I'm moving. Five have been sitting inside (clean, unused) and five have been sitting outside in a stack (top bucket has been collecting rainwater, otherwise all clean and unused). Purchased in bulk for \$55 originally, asking \$50 OBO for the lot.

If you're interested in building self watering planters I'll throw in my long length of PVC pipe and some small wicking containers for free.

Keywords: garden, container gardening, permaculture, organic, fermenting, construction, storage, prepper, preparation,.
