QR Code Link to This Post Are you living paycheck to paycheck? 76 percent of all Americans live paycheck to paycheck. We were raised into a broken system with the wrong knowledge. The school system is broken. Industrial age teaching where they tell you to go to school, get a job, buy a house just to pay off debt for the rest of your life. Real estate has created more millionaires than any other industry. With our group you will learn all aspects of real estate investing. Just in the basics you will learn how to pay off a 30 year mortgage in 5-7 years, without refinancing, using your existing budget all while creating more cashflow per month. You can also use this strategy to pay off student and auto loans since they are both amortized. They teach this strategy in other countries and the big corporations use it as well. By having a business you can turn your everyday expenses into a write off! The tax code is written for entrepreneurs. The government wants you to provide housing, farming and employ other individuals. Technology is here today, gone tomorrow replaced by something bigger, better, faster and stronger. Real estate will always be in demand. People will always need a place to stay, a place to conduct business.
