QR Code Link to This Post SONDORS Thin 7- Red / Silver, 36V with upgraded 10.5 Ah Li-Ion Battery, Front Suspension upgrade, and the optional LCD Screen. This SONDORS LCD Screen is compatible only with the SONDORS Thin and unlocks an additional four (providing a total of five) levels of electric pedal assist plus added torque for increased hill-climbing power, greater range, and improved towing capacity. In addition, the SONDORS Thin LCD screen supplies a digital display offering accurate battery level, time and distance traveled, as well as outside temperature.

I purchased all three of the different Sondors Electric Peddle Assist bicycles and love all of them but I must sell at least one to keep my wife happy. I purchased two of the Fold X, this Sondors Thin 7 and a Sondors X which may also be listed. The Thin and Sondors X both are too tall for my wife and almost too tall for me. The two Sondors Fold X are better suited for our type of riding so I am putting the two others up for sell. I am selling this bike at the cost I paid before the \$154.00 shipping and the \$100.00 optional LCD Screen. Why pay \$254.00 more, then have to wait for it to arrive without really knowing if it is a right fit until after it arrives and you assemble it? This one is ready to try and take home with you. Below is pretty much copied and pasted from the Sondor site.

The sleekest electric bike ever just got taken to the next level with impeccable components, clean lines, and lightweight design define Thin 7. SONDORS proprietary, lithium-ion battery, Genuine Shimano 7-Speed gear cassette with grip shifter, and an all-aluminum frame make Thin 7 the perfect mode of transportation for the daily commuter or weekend adventurer in you.

With SONDORS Thin 7 you have the freedom of full-electric power with a simple press of a thumb throttle, or the option of using all seven gears for cycling with increased hill climbing power, further range variation, and greater terrain adaptability - it's like getting two SONDORS in one.

## THIN 7 FRAME

SONDORS Thin 7 durable, 100% aluminum, 19" frame is a one-size-fits-most, and weighs in at just 4.2 pounds - offering a total bike weight of only 38 pounds.

<p>SONDORS Thin 7 battery has a primary design feature to SONDORS Thin 7, this 36V 8.5Ah lithium-ion battery uses Panasonic cells and the SONDORS patented triangular shape making it more lightweight, slender, and more maneuverable, and a perfect fit for Thin 7. SONDORS Thin 7 is also available with an upgraded 10.5Ah battery providing greater hill-climbing power, greater range, and improved towing capacity. In addition, the SONDORS Thin LCD screen supplies a digital display offering accurate battery level, time and distance traveled, as well as outside temperature.</p>	<p>SONDORS Thin 7 battery has a primary design feature to SONDORS Thin 7, this 36V 8.5Ah lithium-ion battery uses Panasonic cells and the SONDORS patented triangular shape making it more lightweight, slender, and more maneuverable, and a perfect fit for Thin 7. #### THIN 7 SHIFTER

SONDORS Thin 7 includes a genuine Shimano 7-Speed gear cassette with grip shifter. This feature gives Thin 7 its name and supplies an additional 7 gears for increased hill climbing power, further range variation, and greater terrain adaptability. It's like getting two SONDORS in one.

#### THIN 7 TIRES

SONDORS Thin 7 is an artful conception - and its Kenda brand tires are no exception. Measuring in at a sleek 28" x1.75", Thin 7 tires keep it lean and light while enhancing the overall ease of maneuvering and handling.

#### THIN 7 RANGE

With the use of the included SONDORS Thin 36V 8.7 Ah lithium-ion battery along with 7-gears and electric pedal assist, many riders can experience a varied battery range of up to 30-50 miles\*. When using straight electric power (without pedaling), the range can fluctuate to around 20 miles\*.

SONDORS Thin 7, 36V 10.5Ah battery upgrade provides an approximate increase in range of 34 miles\* straight electric and 68 miles\* using electric pedal assist.

\*Both range estimates are contingent upon rider and towing weight, wind speed and terrain.

#### THIN 7 LCD SCREEN UPGRADE OPTION

SONDORS Thin 7 comes with an optional LCD screen upgrade - this feature supplies Thin 7 with five levels of electric pedal assist plus added torque for increased hill climbing power, greater range, and improved towing capacity. In addition, the Thin 7 LCD screen provides a digital display offering accurate battery level, time and distance traveled, as well as outside temperature.

#### THIN 7 FRONT SUSPENSION UPGRADE OPTION

A high-performance, shock-absorbing, non-adjustable, front suspension fork can be yours to take your SONDORS Thin 7 riding comfort to the next level. You can expect better handling, improved cornering capabilities, and an overall smoother riding experience.

#### FRONT AND REAR DISC BRAKES.
